Sage 50cloud Pastel Intelligence Reporting

With accurate insights into your data, you'll have the confidence to make timely, more informed business decisions.

Save time. Take control. Take action.

“Sage Intelligence Reporting saves us so much time. More importantly, the amount and type of information we can get out of our systems helps us to make better business decisions.” - Susan le Roux, Financial Manager, In Our Green House

We appreciate that not all businesses report on data in the same way. We also know that creating the perfect report can take hours, if not days, to complete — especially if you prefer to create it in Excel® to make the most of its calculation and data analysis features. Sage 50cloud Pastel Intelligence Reporting simplifies the reporting process for you, providing you with reports that are easy to customise and analyse.

With just a few clicks, Intelligence Reporting automates the manual reporting process and delivers reports in Excel. Reports are automatically updated with data from Sage 50cloud Pastel; there's no manual exporting, consolidating, or cutting and pasting of data. There are no broken formulas to fix, and, there's no need to reformat the same report month after month.

Key benefits for your business:

Save time. View and analyse information quickly with a suite of powerful, pre-built reports.

Take Control. Take control of your business data with financial reports that you're able to tweak and edit to suit your needs.

Take action. Get a bird's eye view of your business with the added ability to easily drill-down into the details and get the insight you need to make better decisions.

Key Features

Intelligence Reporting is equipped with the following features to help you effectively run your business:

- Interactive dashboards and report views.
- Familiar Excel viewing and tools.
- Near real-time data automatically pulled from Sage 50cloud Pastel into Excel.
- Ready-to-use reports from day one.
- Fully customisable reports.
- Drag-and-drop report design.
- Flexible reporting and user parameters.
- Easy filtering and roll-up summarisation.
- Automated report distribution.

Key Components

Report Viewer. The Report Viewer allows you to run out the relevant reports. It comes with basic filtering capabilities (filtering and changing of parameters) and drill-down functionality on existing reports.

Report Manager. The Report Manager allows you to author new reports, filter and aggregate data, as well as create new reports with the standard data tables available. This tool also allows you to set permissions and security for reports.

Report Designer. This Excel add-in allows you to easily create and edit financial statements using a graphical “drag and drop” interface, giving you full control of your financial reports.

Connector module. The Connector module allows you to connect to more than one database at a time, enabling you to do multicompany or multicurrency consolidations and create new data containers for specific customized reports on any part of your Sage Business Solution and/or any other data sources.

1 in 4

Small business owners agree that creating reports to see how the business is doing is one of their top pain points.

Why Intelligence Reporting?

Better decision making, improved efficiency and business growth are the top three reasons business owners use business intelligence.

98 percent of Sage customers rely on data to either support or aid in their decision-making processes. However, there's never enough time to sort through the waves of spreadsheets, presentations, reports, and databases to find and analyse the data needed to make the best decisions. Intelligence Reporting helps you come to grips with your business's data, so you can make business decisions with confidence.

With Intelligence Reporting, you can easily analyse the data that has an impact on your business. Using dashboards, you can get the bigger picture of what's going on in your business. You can also drill down into the details of the information at your fingertips to see how the numbers are made up.(ODBC compliant).
