

Reports you can rely on. Information you can act on.

We can appreciate that not all businesses report on data in the same way. We also know that creating the perfect report can take hours, if not days, to complete. With Sage 50 Intelligence Reporting, you get customizable Microsoft® Excel®-based business reports, updated straight from your Sage 50 software, so you can access the information you need to make swift, confident decisions. No manual exporting, consolidating, or cutting and pasting data. No broken formulas to fix. No need to reformat the same report month after month.

You get the latest information when you want it, presented in a way that makes sense for your business. And, best of all, you get it in Excel which means you can edit it, analyse it and send it far and wide in a program you already know how to use.

Sage 50 Intelligence Reporting is a simple and easy to use reporting solution that is built into your Sage 50 software and designed with the needs of small and midsized businesses in mind.

Critical information made visible

Intelligence Reporting gives you customized reports, on-demand, without having to manually update any spreadsheets. It pulls real-time information directly from Sage 50—and even other databases—into any report template you’ve saved. Drill down for more detail, slice and dice your data to find the answers you want, and make informed business decisions with confidence.

Spreadsheet-based reporting at your fingertips

Who doesn’t love quick ROI? Intelligence Reporting is ready to launch from within your Sage 50 solution. It’s Microsoft® Excel®-based, so the tools and features may already feel familiar and intuitive, and it comes with powerful and useful standard reports you can produce right away.

The flexibility of customization—without the frustration

Intelligence Reporting comes standard with financial, sales, inventory and purchasing reports. In addition, you or your accountant can custom-design almost any report you need, in the familiar interface of Microsoft Excel giving you total control over your reporting process. Every customization you make can be saved for future use, sparing you time and effort.

Flexible financial reporting

You can take control of financial reporting with the Report Designer, which speeds up the building of financial reports. User-friendly features help reduce the learning curve, like intuitive drag-and-drop tools that make it simple to design financial reports.

Benefits

- Reduces manual report writing, saving you time and money
- Improves your access to information for better decision making in your business
- Presents your information in the familiar face of Excel so you can easily analyse your data and improve your business insights
- Improves operational efficiencies and increases productivity, giving you a rapid return on investment
- Ships with ready-to-use report templates, which can be customized to meet your unique requirements
- Comes with plenty of resources, material and support to help you maximize your investment

I enjoy the ease of use in creating and changing filters to run similar reports without having to create an entirely new report. I enjoy the ease with which I can provide the necessary detail. Most importantly, I save valuable time.” ”

Sage 50 Intelligence Reporting

Improved efficiencies

Intelligence Reporting automates the reporting process to streamline your efforts, resulting in greater efficiency. Not only can you run reports at the click of a button, you can also schedule them to run at the most optimum time of day, for example during off-peak hours, and then automatically distribute them in the required format to those who need to see them.

Insight across your business

To stay competitive, you need more than simple general ledger reporting. Intelligence Reporting gives you the information you need from across your entire business, allowing you to combine information from multiple sources (including your accounting, CRM, and payroll databases) to deliver a 360-degree view of your company. Graphical dashboards provide a visual overview of your company's key performance indicators (KPIs), while drilldown capabilities give you further insight into the numbers. And of course you can use Excel's analysis tools to filter, sort and analyze data. With better insight, you can track performance and easily identify trends to aid decision making.

Role-based security to protect your data

Security controls give you the ability to set access to information based on the user's role, so you can protect the integrity of sensitive or confidential data.

Why choose Sage 50 – US Edition Intelligence Reporting?

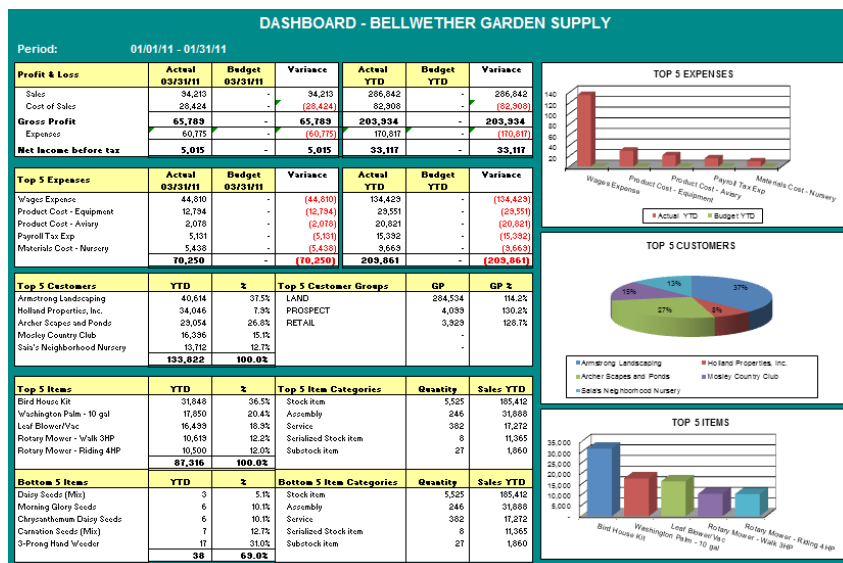

Easily implemented, Intelligence Reporting requires minimal IT support. It integrates seamlessly with Sage 50 – US Edition and it enables you to pull data from most external systems too, allowing for data consolidation across the company.

After a 60-day free trial, the service is available with Sage 50 Pro Accounting 2014 and higher; included at no additional charge with Sage Business Care.

With additional Intelligence Reporting module components available, you have the flexibility to build a robust reporting system that does what you need it to do and fits your business's unique reporting needs.

Get your data under control, turn it into useful information, and get up to a 25% increase in reporting productivity with Sage 50 – US Edition Intelligence Reporting.
