

	Sage Intelligence Reporting Cloud	Fathom	CrunchBoards	Spotlight
Primary customer	 Startup and small business owners and advisers			
Overview	Whether it's keeping track of who owes you money, what your best and worst selling items are, how your sales reps are doing in comparison to one another, or keeping your team abreast of your business goals and achievements, Intelligence Reporting helps you create reports that mean something to your business!	Fathom provides a suite of in-depth analysis tools and metrics which help you see exactly how well your business is performing. These tools and metrics help to assess profitability, cash flow, growth, and other key performance indicators (KPIs).	Unlike manipulating spreadsheets, where you need a degree in Excel, slicing and dicing your data in CrunchBoards is easy, effortless, and beautifully presented. And most importantly, you can view it the way you want it to be!	Making informed decisions based on business intelligence is a must for businesses wanting to achieve better results. Spotlight Reporting provides both clarity and actionable insights to help your business succeed.
